

A BRIEF IDEA ON STEREOCHEMISTRY: AN IMPORTANT TOPIC FOR ALL UNIVERSITY - AND CSIR INSTITUTES - BASED EXAMINATIONS

STEREOCHEMISTRY

BASIC TO ADVANCES IN ORGANIC CHEMISTRY

Dr. Khushal Kapadiya
Dr. Amita Jivani

Himalaya Publishing House
ISO 9001:2015 CERTIFIED

CONTENTS

1. Isomers	1 - 3
2. Various Types of Projection in Stereochemistry	4 - 7
3. Conformation of Acyclic System	8 - 13
4. D & L Nomenclature	14 - 16
5. Absolute Configuration	17 - 30
6. Threo and Erythro Nomenclature	31 - 31
7. Conformational Analysis of Cyclohexane	32 - 37
8. Conformational Analysis of Mono Substituted Cyclohexane	38 - 39
9. Flipping in Cyclohexane	40 - 41
10. Some Basic Terms Used in Stereochemistry	42 - 49
11. Residual Stereoisomers	50 - 50
12. Meso Compounds	51 - 51
13. Plane of Symmetry (σ) Chirality	52 - 53
14. Racemic Modification	54 - 54
15. Racemic Compound or Racemate	55 - 55
16. Racemization	56 - 56
17. Resolution of Racemic Mixture	57 - 61
18. Threo and Erythro Nomenclature	62 - 66
19. Dynamic Stereochemistry	67 - 70
20. Product Stereoselectivity	71 - 71
21. Prochirality/Prostereoisomerism	72 - 81
22. Nomenclature of Prochiral Faces/Groups/Ligands	82 - 85
23. Diastereomers of Acyclic Molecules/Stereoselectivity of Carbonyl Compounds/Cram's Rule and their Newman Projection and Fisher Projection	86 - 87
24. Application of Cram's Rule	88 - 90
25. Felkin-Anh Model or Karabatsos Model	91 - 92
