

Sasadhar Majhi

# Green Chemistry and Sustainability

## A Unified Approach

**Narosa**

For Sale in India, Pakistan, Bangladesh, Nepal, Bhutan and Sri Lanka only

# Contents

<i>Foreword</i>	vii
<i>Preface</i>	ix
<i>Acknowledgements</i>	xi
<b>1. Concepts of Green Chemistry</b>	<b>1.1—1.11</b>
1.1 What is Green Chemistry? (Introduction)	1.1
1.2 Need for Green Chemistry	1.2
1.3 Goals of Green Chemistry	1.4
1.4 Limitations/Obstacles in the Pursuit of the Goals of Green Chemistry	1.7
1.5 Questions Answers	1.8
1.6 Exercises	1.10
1.7 References	1.10
<b>2. Principles of Green Chemistry and Designing a Chemical Synthesis</b>	<b>2.1—2.41</b>
2.1 Twelve Principles of Green Chemistry	2.1
2.2 Explanation of Twelve Principles of Green Chemistry	2.2
2.2.1 Prevention (Principle 01)	2.2
2.2.2 Atom Economy (Principle 02)	2.4
2.2.2.1 Grignard Reaction	2.4
2.2.2.2 Diels-Alder Reaction	2.5
2.2.2.3 Synthesis of Ibuprofen	2.5
2.2.2.4 Calculations of the Atom Economy of Elimination, Substitution, Addition, and Rearrangement Reactions	2.7
2.2.2.5 Comparison of the Atom Economy Between the Traditional Approach and Greener Approach with Example	2.10
2.2.2.6 Green Chemistry Metrics	2.11
2.2.3 Less Hazardous Chemical Synthesis (Principle 03)	2.13
2.2.4 Designing Safer Chemicals (Principle 04)	2.14
2.2.5 Safer Solvents and Auxiliaries (Principle 05)	2.15
2.2.5.1 Supercritical CO <sub>2</sub> (ScCO <sub>2</sub> ) as a Green Solvent	2.15
2.2.5.2 Advantages of Polyethylene Glycols (PEGs) as a Green Solvent	2.15
